www.github.com/jahreja

A confident, diligent final year Fine Art student with a passion for uniting contemporary creativity with technology. Capable and experienced in a variety of fields spanning both the arts and computing, with additional strengths in communication and organisation.

Technical Skills

- JavaScript, ES6
 - Python
 - Node.js
 - HTML5
 - MongoDB
 - Version Control (Git)
 - CSS
 - Express.js
 - Adobe Creative Suite
- Adept programmer, with a clear, consistent style and an intuitive, imaginative approach to project planning and problem-solving.
 - Acute sense of artistic composition and design, proven through interdisciplinary fine art outcomes on an exhibition level.

Personal Skills

- **Confident Collaborator** - working in teams has always been a fundamental aspect of both my academic and personal life. My university course has allowed me to undertake key leading roles in four art exhibitions over the last few years and collaborating with peers is at the heart of the studio practice at The Glasgow School of Art, and I am comfortable operating in a range of roles, both as a part of a team and under my own initiative.
- **Driven and Motivated Learner** - while my course has provided the facilities to produce work, it has been my responsibility to direct the work itself. Philosophy, maths and physics have all played crucial parts in my practice, having self-taught the required knowledge. This passion has carried through to my technical side, quickly teaching myself a range of skills including painting, 3D modelling, and an array of programming languages.
- **Flexible and Organised** - my self-driven working style goes hand-in-hand with efficient, practical time management. This has been highlighted over the past year, with a successful adaptation to a self-directed artistic practice in a home studio environment throughout the pandemic.

Education
